

Azure DevOps

From initial consultation and requirements analysis to design, development, testing, and ongoing maintenance, entire software development lifecycle.

Micro Research Group (Private) Limited

Micro Research Group (Private) Limited was Founded in 2011 , is dedicated to providing innovative and tailored software solutions to meet the unique needs of our clients. We pride ourselves on our expertise in custom software design and development, ensuring that each project aligns perfectly with our clients' business goals.

From initial consultation and requirements analysis to design, development, testing, and ongoing maintenance, we cover the entire software development lifecycle. Our commitment to using the latest technologies and best practices ensures that we deliver high-quality, scalable, and secure software solutions that drive business success.

We provide wide range of IT services designed to meet the diverse needs of businesses and organizations such as Software development , Web development , Mobile app development , Digital Marketing , Quality Engineering , UI/UX Design , Cloud Migration , Cyber security and Cloud Migration.

What is Azure DevOps?

Azure DevOps provides a suite of development tools and services designed to facilitate collaboration, streamline workflows, and enhance the efficiency of software development and deployment processes. The main services offered by Azure DevOps include:

Azure Repos: Provides Git repositories or Team Foundation Version Control (TFVC) for source control of your code.

Azure Pipelines: Facilitates continuous integration (CI) and continuous delivery (CD) to build, test, and deploy applications to any platform.

Azure Boards: Delivers a suite of agile tools to support planning, tracking, and discussing work across your teams.

Azure Test Plans: Offers a rich set of tools to test your applications, including manual/exploratory testing and continuous testing (automated testing).

Azure Artifacts: Allows you to create, host, and share packages with your team, and add artifacts to your CI/CD pipelines.

Azure Devops Services

Azure Repos

Get unlimited, cloud-hosted private Git repos for your project.

Support for any Git client

Securely connect with and push code into your Git repos from any IDE, editor, or Git client.

Web hooks and API integration

Add validations and extensions from the marketplace or build your own using web hooks and REST APIs.

Semantic code search

Quickly find what you're looking for with code-aware search that understands classes and variables.

Azure Pipelines

Get cloud-hosted pipelines for Linux, macOS, and Windows. Build web, desktop and mobile applications. Deploy to any cloud or on-premises.

Automate your builds and deployments with Pipelines so you spend less time with the nuts and bolts and more time being creative.

Any language, any platform

Build, test, and deploy Node.js, Python, Java, PHP, Ruby, C/C++, .NET, Android, and iOS apps. Run in parallel on Linux, macOS, and Windows.

Containers and Kubernetes

Easily build and push images to container registries like Docker Hub and Azure Container Registry. Deploy containers to individual hosts or Kubernetes.

Extensible

Explore and implement a wide range of community-built build, test, and deployment tasks, along with hundreds of extensions from Slack to SonarCloud.

Deploy to any cloud

Implement continuous delivery (CD) of your software to any cloud, including Azure, AWS, and GCP. Visualize deployment to any number of interdependent stages.

Free for open source

Ensure fast continuous integration/continuous delivery (CI/CD) pipelines for every open source project. Get 10 free parallel jobs with unlimited build minutes for all open source projects.

Advanced workflows and features

Take advantage of easy build chaining and multi-phased builds. Support for YAML, test integration, release gates, reporting—and more.

Azure Boards

Plan, track, and discuss work across your teams.

Track work with Kanban boards, backlogs, team dashboards, and custom reporting

Combine drag-and-drop sprint planning and flexible work item tracking with comprehensive traceability to have the perfect home for all your ideas—big and small.

Connected from idea to release

Track all your ideas at every development stage and keep your team aligned with all code changes linked directly to work items.

Scrum ready

Use built-in scrum boards and planning tools to help your teams run sprints, stand-ups, and planning meetings.

Built for insights

Gain new insights into the health and status of your project with powerful analytics tools and dashboard widgets

Azure Test Plans

Test and ship confidently with an exploratory test toolkit.

Improve your code quality using planned and exploratory testing services for your apps.

Capture rich data

Capture rich scenario data as you execute tests to make discovered defects actionable.

Test across web and desktop

Test your application by executing tests across desktop or web apps.

Get end-to-end traceability

Take advantage of end-to-end traceability and quality for your stories and features.

Azure Artefacts

Create, host, and share packages with your team.

Create and share Maven, npm, NuGet, Python, and Rust package feeds from public and private sources

Add fully integrated package management to your continuous integration/continuous delivery (CI/CD) pipelines with a single click. Create and share Maven, npm, NuGet, Python, and Rust package feeds from public and private sources with teams of any size.

Share code efficiently

Easily share code across small teams and large enterprises.

Manage all package types

Get universal artifact management for Maven, npm, NuGet, and Python.

Add packages to any pipeline

Share packages, and use built-in CI/CD, versioning, and testing.

Benefits of having Azure DevOps servises to your business

Implementing Azure DevOps services can bring numerous benefits to your business, particularly if you are involved in software development and IT operations. Here are some of the key advantages:

Enhanced Collaboration and Communication: Integrated tools facilitate seamless collaboration and communication between development and operations teams.

Improved Efficiency and Productivity: Automation of builds, tests, and deployments speeds up the software delivery process.

Higher Quality Software: Comprehensive automated testing ensures high-quality code and early bug detection.

Scalability and Flexibility: Cloud-based services offer scalability for any project size and flexibility to work from anywhere.

Cost Efficiency: The pay-as-you-go model allows businesses to scale services as needed and pay only for what they use.

Security and Compliance: Built-in security features and compliance certifications ensure secure development and operations processes.

Streamlined Development Lifecycle: A unified platform manages the entire application lifecycle from planning to deployment.

Innovation and Competitive Advantage: Faster time-to-market and enhanced focus on innovation help maintain a competitive edge.

Our core values as a Azure DevOps services provider

As an Azure DevOps services provider, your core values might include:

Customer-Centricity: We prioritize our customers' needs and strive to deliver tailored solutions that drive their success.

Innovation: We embrace and drive technological innovation to stay ahead in the rapidly evolving DevOps landscape.

Collaboration: We foster a collaborative environment, both within our team and with our clients, to achieve the best results.

Quality: We are committed to delivering high-quality services and solutions that meet or exceed industry standards.

Integrity: We conduct our business with the highest ethical standards, ensuring transparency and trust in all our dealings.

Agility: We are adaptable and responsive, able to quickly adjust to changing requirements and market conditions.

Continuous Improvement: We continuously seek to improve our processes, skills, and services to provide the best value to our clients.

Security: We prioritize security in all our solutions, ensuring our clients' data and systems are protected.

Sustainability: We are committed to sustainable practices and minimizing our environmental impact.

Excellence: We strive for excellence in everything we do, from the services we provide to the relationships we build with our clients.

Our Team

Our team, as an Azure DevOps services provider, is composed of a diverse group of highly skilled professionals dedicated to delivering top-notch solutions tailored to meet the unique needs of our clients. With extensive experience in DevOps practices and a deep understanding of the Azure ecosystem, our team is well-equipped to handle projects of any scale and complexity.

At the heart of our team are our Azure DevOps Engineers, who specialize in continuous integration, continuous delivery, and infrastructure as code. These experts are proficient in setting up and managing Azure Pipelines, Azure Repos, and other essential DevOps tools. Their technical acumen ensures that our clients' software development processes are efficient, reliable, and scalable. Our engineers work closely with clients to understand their requirements and implement solutions that align with their business goals.

Complementing our engineering team, our Project Managers play a crucial role in coordinating and overseeing all aspects of our projects. They ensure that projects are delivered on time, within budget, and to the highest standards. By maintaining clear communication channels and fostering collaboration among team members and stakeholders, our Project Managers help to mitigate risks and address any challenges that arise during the project lifecycle.

Our team also includes Security Specialists who focus on integrating robust security measures into our DevOps processes. They ensure that our clients' applications and infrastructure are protected against potential threats by implementing best practices for security and compliance. This commitment to security is a core aspect of our service offering, providing our clients with peace of mind.

Our Team

In addition, our Support and Training Specialists are dedicated to helping clients maximize the value of their Azure DevOps investments. They provide ongoing support, troubleshooting, and training to ensure that clients' teams are well-equipped to use the tools and processes we implement. By empowering our clients with the knowledge and skills they need, we help them achieve long-term success.

Together, our team combines technical expertise, project management excellence, and a strong focus on security and support to deliver comprehensive Azure DevOps services. We are passionate about helping our clients transform their software development and IT operations, driving innovation, and achieving their business objectives..

MICRO RESEARCH GROUP (PVT)LTD.

Empathy is our line of Code.
Trust is our interface to the world.
